DETAILED ACTION

1. The location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1644, Group 1640, Technology Center 1600.
2. Applicant's preliminary amendment, filed on 11/26/99 (Paper No. 5), is acknowledged.
Claims 3-5 and 9-14 have been amended.
Claim 6 has been canceled.
Claims 1-5, 7-14 are pending.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this Action, to elect a single invention to which the claims must be restricted:

- I. Claims 1-5, 11 and 14, drawn to a purified antibody that binds a nitrosylated protein and a pharmaceutical composition.
- II. Claims 7-10, drawn to an immunogen coupling to a carrier protein selecting from the group carbodiimide, glutaraldehyde or succinic anhydride.
- III. Claim 12, drawn to a method of using antibody to treating or preventing a pathology.
- IV. Claim 13, drawn to in vitro detection of nitrosylated protein.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Consistent with the International Search Report, the Invention of Group I was to have no special technical feature that defined the contribution over the prior art of Ye *et al.*, (Methods in Enzymology 269: 201-209, 1996).

Ye *et al.* teaches how to make and use polyclonal and monoclonal antibodies that recognizes a nitrosylated proteins including albumin (See entire document, pages 202-204 in particular). Since Applicant's inventions do not contribute a special technical feature when

viewed over the prior art they do not have single general inventive concept and lack unity of invention.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
